TabBook

Innovative booklet case with stand function for BlackBerry® PlayBook™ tablet

This practical yet elegant case not only protects your BlackBerry PlayBook tablet but can also be turned into a stand. The BlackBerry PlayBook tablet is kept safely in place in the cradle made of TPU plastic and you can use the tablet without removing it from the case. On the inside an elastic band gives you support when holding the case. For transportation just close the flap and secure with the outer elastic band. Thanks to the metallic clip on the outer elastic band, this can also be used to transform the case into a stand. The stand can be placed either in typing or in viewing mode. The Built for BlackBerry program is a partnership between Research In Motion® and selected partners. These partners will develop accessories and peripherals specifically designed to work with BlackBerry® smartphones and the BlackBerry® PlayBook™ tablet. Built for BlackBerry accessories will meet a high level of quality and are designed specifically for your BlackBerry smartphone or tablet. These accessories can also leverage advanced features that integrate your accessory and device in new ways.
